

# REVIEW OF THE PLOWS IOPS

24 IOPS during two years of sampling

3 IOPS were aircraft calibration or survey flights

21 IOPS dedicated to science missions

Platform participation in 21 science IOPS

<b>MIPS</b>	<b>17</b>
<b>MAX</b>	<b>13</b>
<b>MISS</b>	<b>13</b>
<b>MISSOU</b>	<b>10</b>
<b>C-130</b>	<b>13</b>

## RANKING BASED ON PLOWS SCIENCE QUESTIONS

- 1) What are the predominant spatial patterns of organized precipitation substructures, such as bands and generating cells, in these quadrants and how do they evolve?
- 2) How do frontal scale systems above and within the boundary layer such as warm fronts,, cold fronts aloft, and occluded fronts relate to these precipitation substructures?
- 3) What are the thermodynamic and kinematic structures of these frontal systems including the distribution of moisture and vertical motion?
- 4) What instabilities and types of mesoscale forcing (e.g., moist CSI, moist frontogenesis, gravity waves, and elevated upright convection) control the generation and evolution of precipitation substructures?
- 5) How do microphysical processes vary between the different precipitation substructures and what are the consequences?
- 6) Is instability triggered in ice-saturated ascent critical in some of these instances and is it through the release of the latent heat of deposition that instabilities can persist?

## RANKING FOR PLOWS IOPS

5	Excellent:	Met most or all PLOWS objectives	Top Priority
8	Very Good:	Met many PLOWS objectives	High Priority
5	Good	Data support PLOWS objectives	Medium Priority
3	Fair	Data interesting, but not likely to satisfy PLOWS objectives	Low priority
0	P: Poor	Data met little if any PLOWS Objectives	Very low priority

# EXCELLENT

- IOP-1 **10 February 2009, 0800 UTC – 12 February 2009 0000 UTC**  
N. Illinois: Rockies cyclone moves over midwest  
MIPS/MAX/MISSOU (KLOT:VCP-11)
- IOP-9 **2 December 2009, 0000 UTC – 03 December 2009 0700 UTC**  
Indiana-Illinois: Gulf Coast cyclone moves up into Ohio Valley  
All Facilities deployed (KIND: VCP-11)
- IOP-10 **08 December 2009, 0000 UTC – 09 December 2009 1200 UTC**  
Eastern Iowa: Rockies cyclone produces heavy snow across Iowa  
All Facilities deployed (KDVN VCP-11)
- IOP-19 **14 February 2010, 1200 UTC – 15 February 2010 1800 UTC**  
Southern Indiana: Cyclone forms in Midwest on wave orbiting polar vortex  
MAX/MISS/C-130 deployed (KVWX VCP-11)
- IOP-21 **21 February 2010, 1200 UTC – 22 February 2010 1200 UTC**  
Iowa/Missouri/Illinois: Cyclone forms on weak wave from Southern Rockies  
All Facilities deployed (KILX VCP-11)

IOP-1

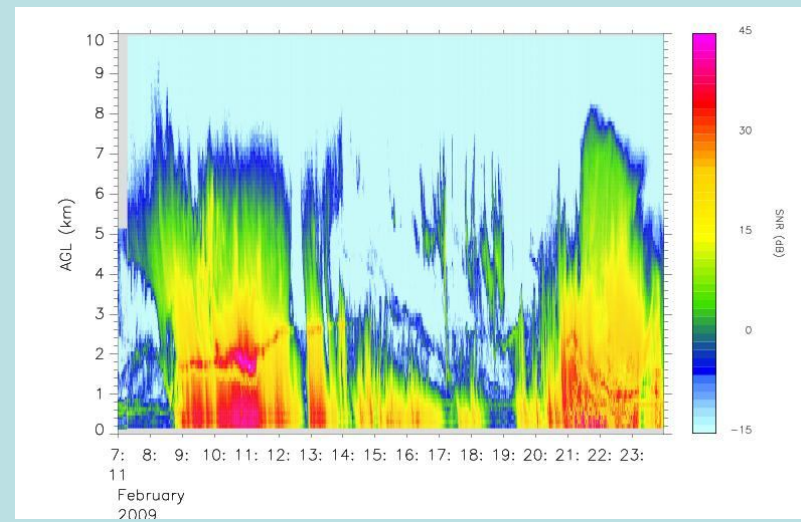

**10 February 2009, 0800 UTC – 12 February 2009 0000 UTC**

(Year 1)

N. Illinois: Rockies cyclone moves over midwest

MIPS/MAX/MISSOU

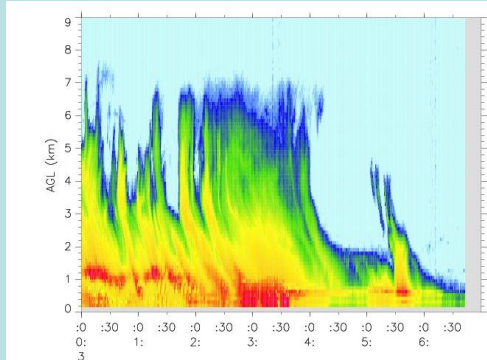

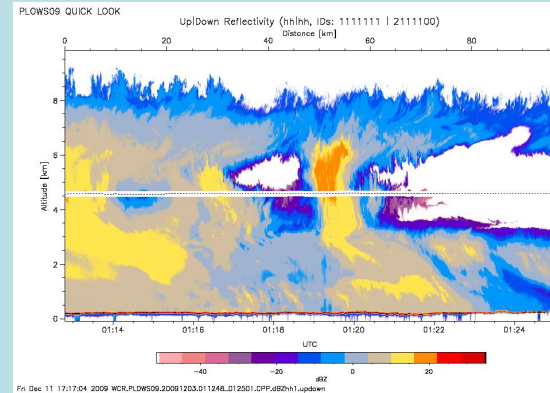

(KLOT: VCP-11)

**IOP-9 2 December 2009, 0000 UTC – 03 December 2009 0700 UTC**  
**Indiana-Illinois: Gulf Coast cyclone moves up into Ohio Valley**  
**All Facilities deployed (KIND: VCP-11)**

**RF-03**

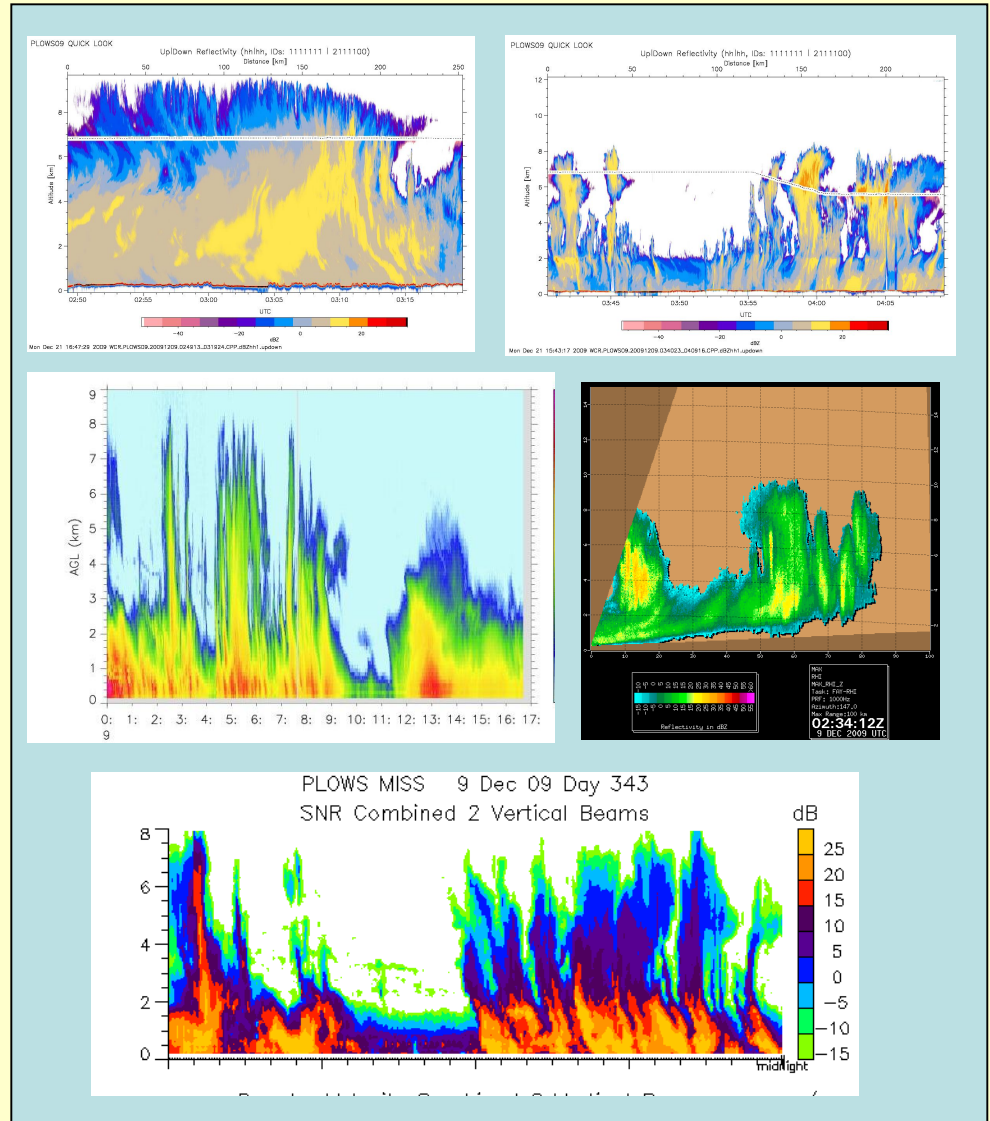

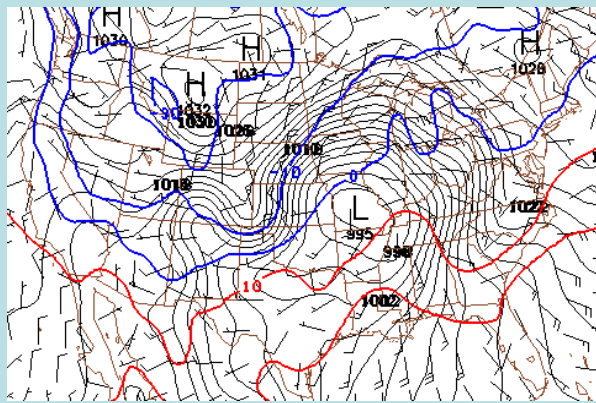

# IOP-10 08 December 2009, 0000 UTC – 09 December 2009 1200 UTC

## Eastern Iowa: Rockies cyclone produces heavy snow across Iowa

### All Facilities deployed (KDVN: VCP-11)

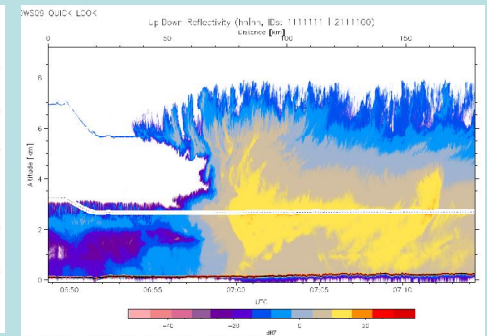

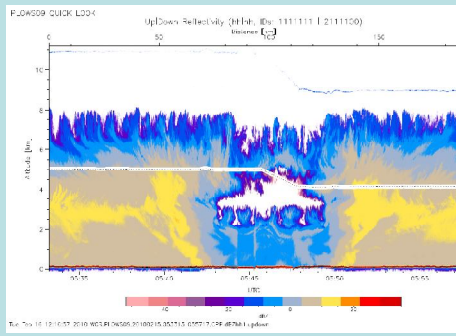

RF-04

**IOP-19 14 February 2010, 1200 UTC – 15 February 2010 1800 UTC**  
**Southern Indiana: Cyclone forms in Midwest on wave orbiting polar vortex**  
**MAX/MISS/C-130 (MIPS had severe attenuation) (KVWX: VCP-11)**

**RF-12**

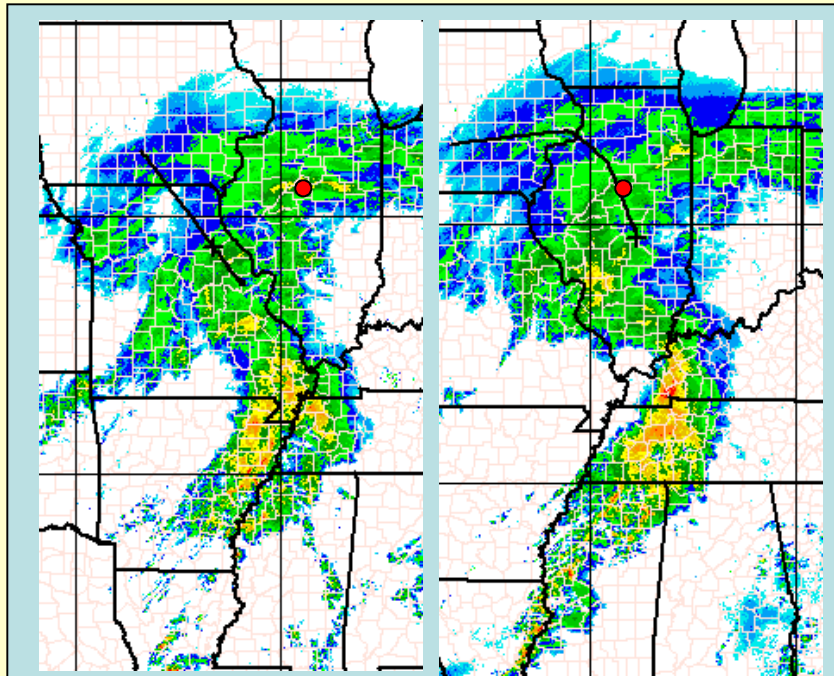

**Vortac-Vortac  
X-Section**

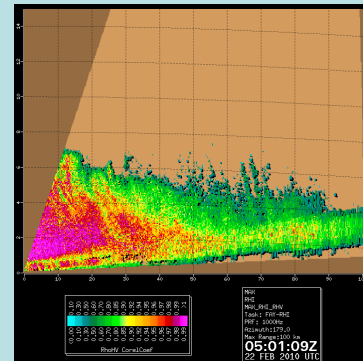

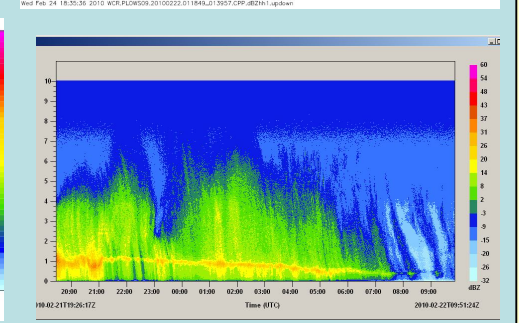

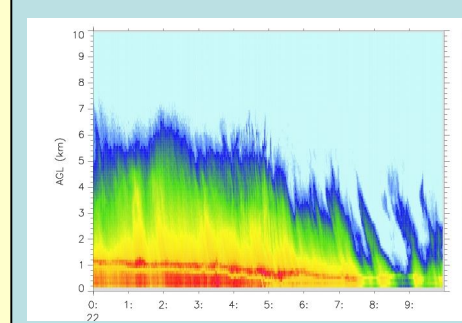

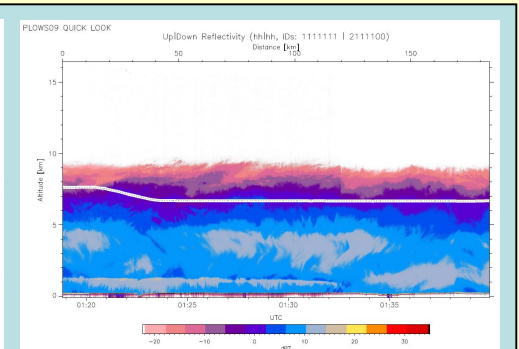

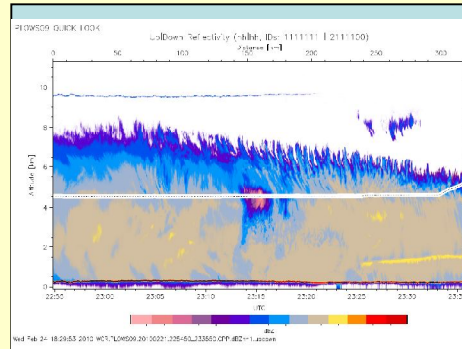

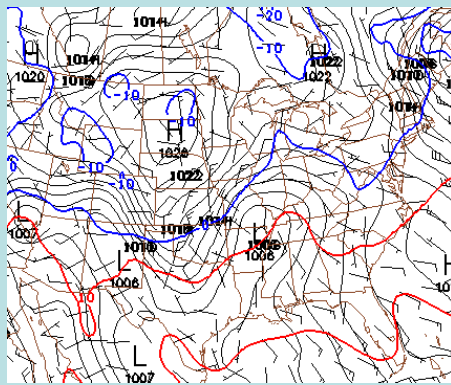

**IOP-21 21 February 2010, 1200 UTC – 22 February 2010 1200 UTC**  
 Iowa/Missouri/Illinois: Cyclone forms on weak wave from Southern Rockies  
 All Facilities deployed  
 (KILX: VCP-11)

RF-14
