

Breakout Session #1: HAIC-HIWC Data Archives

1. Inventory of all data sets from Darwin and Cayenne, including information about processing status, permanent home, responsible party
 1. Draft inventory of known data sets (julie); review with Tom, Walter, Alfons...
 2. Liquid water data set, additional new sets needing special treatment
 3. Links to and pdfs of publications and presentations
 4. Partners distribution list online
 5. Version numbers logged where? Different depending on archival site. Should it be in document on the NCAR site?

1. Common protocols for data sharing and acknowledgment by user
 1. Standard statement for acknowledgment (Alfons, Walter will revise and distribute statement)
 2. Data sharing policy, put document online
 3. Convair data sets, sharing still to be resolved
 4. HIWC Radar campaign data set, estimate cost to archive (Julie provide cost to Tom and Tom)
2. Linking the various data archives (NCAR, NASA, BoM, LaMP. EC/NRC)
3. Preparation of a document summarizing data set locations, access methods, point of contact

1. Linking the various data archives (NCAR, NASA, BoM, LaMP. EC/NRC)
2. Preparation of a document summarizing data set locations, access methods, point of contact
