

Bibliography of GARP Papers, 1979 – 1982
(Edited to make a searchable and reasonably correct document)
(probably from NSF Division of Atmospheric Sciences)

Margaret (Peggy) LeMone, 12 May 2025

NOTE: In editing, I referred to the pdf from which this document was originally constructed. In the conversion, the algorithm had trouble with "G's", to the point that words starting with "G" (like "GATE") were sometimes missing altogether. Though I tried to catch these, there may be "GATEs" or "GARPs" missing. Similarly, when initials in names were in error, I tried to correct them. When an article was listed as "In press" or "accepted for publication," I used Google Scholar to find the proper reference. This document was found in my office; I do not know the source. Hard copies are available at NCAR.

Ackerman, S.A., and Cox, S.K., 1980: Radiation instrumentation and data reduction procedures for the Convair 990 during summer MONEX, Atmospheric Science Paper No. 324, Department of Atmospheric Sciences, Colorado State University, Fort Collins, Colorado, 72 pp.
