

## NSF NCAR Radar Technology Workshop 2026 - Breakout Questions

- **Session Name:** Integration, Data Products, Accessibility, and Training
- **Topic/Scenario:** Accessibility, Workforce Development, and Training
- **Date & Time:** March 11, 2026 | 4:20 – 5:20 pm MST

<b>Title</b>	Accessibility, Workforce Development & Training (and Discussion)
<b>Description</b>	The purpose of this session is to discuss methods and techniques for training scientists and end-users to make best use of radar data. It will also encompass conversation related to adaptive training tools with changing technology and accessibility to those training resources.
<b>Topics and Objectives</b>	<ul style="list-style-type: none"><li>● How will (and should) education and training change with new radar hardware and software?</li><li>● Discuss types of current training and areas that need more attention. How can the private and public sector work together on this issue?</li><li>● Discuss opportunities for future training of different skill levels. Are resources available to help address training shortfalls? If not, what are some ways to seek new methods of support?</li><li>● What are the top priority training needs as the community may change its approach to using radar and associated applications?</li><li>● What are the recommendations of this group to ensure that early-career and young scientists are aware of available training and how to gain access?</li></ul>
