Hello everyone:

The official site survey to set up local arrangements on Christmas Island will take place in January, specifically we will be on the island from 1/9 to 1/16/07. Let us know if there are any outstanding issues that we can look into while we are on site.

Anyone wishing early access to a C-130 rack for pre-installation of your equipment, please send me an email with the date you need the rack and a shipping address.

The final inlet configuration is not yet finalized. Specifically the issue of the LTI inlet is still unresolved. I plan to revisit this discussion in early November when EOL plans for that system have firmed up. That will be a good time to also finalize the cabin layout and set everyone's upload schedule.

I will be out of the office and unreachable from Oct 10th to Oct 21st. If anything critical comes up during that time interval, please contact Pavel Romashkin (pavel@ucar.edu).

Regards:

Allen
